DEUTSCHE BANK — CAPPFINITY RANKING

MOTS-CLÉS — STRONGLY / AGREE / MIDDLE

Comment classer 1 à 5 en 10 secondes — By dragging and dropping, rank 1 (most likely) to 5 (least likely)

Le pattern que tu as à l'écran : C'est TOUJOURS 5 phrases qui vont du plus extrême rigoureux au plus extrême laxiste. Il suffit de repérer les mots-clés pour classer sans même lire tout. Ton exemple *checking is vital vs waste of time* est le template parfait.

1 — L'ÉCHELLE EN 5 NIVEAUX

RANG	NIVEAU	MOTS-CLÉS À REPÉRER	POSITION DB
1	**STRONGLY extrême pro-rigour** Le plus engagé	**strongly agree + vital** always + comes naturally to you you know the impact even small mistakes can have for the business	**1 — MOST**
2	**AGREE pro-rigour** Engagé mais moins fort	**agree + everything should be checked** do not mind checking worth spending the time peace of mind that there are no mistakes	**2**
3	**MIDDLE — un peu des deux** Balancé / conditionnel	**can see the merits of both views** If it is important ... then ... However, if you can get away ... some checks can be skipped efficient vs thorough	**3 — Neutre**
4	**AGREE laxiste** Pragmatique	**not an efficient way to use time** pragmatic a lot of the time a few errors do not really matter while there are occasions where zero errors is important	**4**
5	**STRONGLY extrême laxiste** Rejet total	**strongly agree + waste of time** better to produce more work with acceptable errors does not need checking If you do the work properly, it does not need checking	**5 — LEAST**

Astuce 10 sec : Ne lis pas tout. Cherche **strongly** + **always/vital** → c'est 1 ou 5. Cherche **can see merits of both views** → c'est 3 direct. Le reste se place tout seul.

2 — TON EXEMPLE DÉCRYPTÉ

Question : *Some colleagues think checking is a waste of time that could be spent doing other things; others think it is vital to check everything for errors and is always worth the time. What do you think?*

Rang que tu as mis	Lettre	Phrase (début)	Mots-clés détectés	Verdict DB
1	E	You **strongly agree** it is **vital to check everything**... **always** check... **comes naturally**... **impact small mistakes**...	strongly + vital + always + naturally + impact	■ **Parfait**
2	B	You **agree** everything should be checked... **do not mind**... **worth spending time**... **peace of mind**...	agree + worth + peace of mind	■
3	C	You **can see the merits of both views**... **If important then check**... **However if you can get away with few errors and be more efficient then skip**...	both views + If... However...	■ **Neutre**
4	D	You agree checking is **not efficient**... **pragmatic**... **a lot of time a few errors do not really matter**...	not efficient + pragmatic + do not matter	■
5	A	You **strongly agree** checking is **waste of time**... **better to produce more with acceptable errors**... **does not need checking**...	strongly + waste of time + acceptable errors	■

Pourquoi ton ranking E(1) > B(2) > C(3) > D(4) > A(5) est validé : C'est l'ordre décroissant de rigueur. DB veut E en 1 car E ajoute *comes naturally* + *impact for the business* (plus fort que B qui dit juste *peace of mind*). Si tu avais inversé E et B, ce n'était pas dramatique, mais E en 1 est le plus DB.

3 — RÈGLE GÉNÉRALE POUR TOUS LES RANKING 1-5

1) Repère les 2 STRONGLY : celui qui est pro-DB (vital, always, naturally, impact) → mets 1. Celui qui est anti-DB (waste of time, acceptable errors) → mets 5.
2) Repère le MIDDLE : cherche **can see the merits of both views / If ... However ... / depends / both** → mets 3 direct, c'est toujours le balancé.
3) Les 2 AGREE restants : celui avec *agree + worth / do not mind* → 2. Celui avec *pragmatic / not efficient / a few errors don't matter* → 4.
Temps : 10 sec par question, pas besoin de tout lire.

Autres exemples de mots-clés par thème DB

Thème	STRONGLY pro-DB (rang 1)	AGREE pro-DB (rang 2)	STRONGLY anti-DB (rang 5)
Checking / errors	strongly agree + vital + always + naturally + impact small mistakes	agree + everything should be checked + worth time	strongly agree + waste of time + does not need checking
Teamwork	strongly agree + vital to support others + goes without saying	agree + work closely helps	strongly agree + better to work alone + waste of time to help
Initiative	strongly + always seek new challenges + goes naturally	agree + enjoy new tasks	strongly + prefer easy achievable goals + avoid challenging

Red flag à éviter : Ne mets JAMAIS un STRONGLY anti-DB (waste of time, acceptable errors, a few errors don't matter) en 1 ou 2. C'est un rejet direct pour IB. Et ne mets jamais le MIDDLE en 1 — tu passerais pour indécis.
