### SUMMARY

SKEMA MSc candidate combining multi-asset reporting experience at BPCE with sales and recruitment outreach at FinStart. Brings market monitoring, reporting automation and hands-on options and cross-asset analytics projects. Targeting Global Markets Sales roles across FX, Rates and Equity Derivatives.

### PROFESSIONAL EXPERIENCE

#### BPCE Assurances | Multi-Asset Reporting Analyst Intern

Paris | Jan–May 2024

- Produced multi-asset reporting for investment committees, covering major FX pairs, equity indices, rates and credit spreads.
- Built and used Bloomberg BQL dashboards for daily monitoring and alerts; automated recurring reporting with Excel, XLOOKUP and VBA.

#### FinStart | Sales & Recruitment Analyst Intern

Paris | Jun–Aug 2023

- Conducted market and recruitment research; sourced finance candidates and maintained candidate and client databases.
- Ran targeted, high-volume email outreach and supported candidate sourcing and recruitment workflows.

### LEADERSHIP & WRITING

#### SKEMA Job Service Paris | HR & Corporate Partnerships (student association)

- Conducted interviews; contributed to events and corporate prospecting; supported activity reporting and continuity of operations.

#### Major Prépa | Independent contributing writer (self-employed; approximately one year)

- Developed finance and economics writing, research, synthesis and accessible explanation for a specialist student publication.

### EDUCATION

#### SKEMA Business School | Grande École Programme + MSc Corporate Financial Management

2022–2026

Selected coursework: Market Risk (VaR); Equity Derivatives (Black–Scholes, options and Greeks).

#### ÎEPESUP, Paris | ECE Preparatory Programme, intensive mathematics and economics

2021–2022

#### French Baccalauréat | Scientific track, advanced mathematics

2021

### SELECTED PROJECTS

#### CalvinX | Cross-Asset Market Dashboard (JavaScript)

- Monitors FX, equity indices, rates, commodities and volatility; includes risk-on / risk-off regime analysis and export tools.

GitHub: [github.com/Calvin29990/calvinx-market-terminal](https://github.com/Calvin29990/calvinx-market-terminal)

#### ShockLab | Portfolio Stress-Testing Engine (Python, SQL, machine learning)

- Explores geopolitical and macro scenarios using historical market analogues, an SQL event database and interpretable modelling.

GitHub: [github.com/Calvin29990/ShockLab-Fade-or-Cascade](https://github.com/Calvin29990/ShockLab-Fade-or-Cascade)

#### Black–Scholes Options & Greeks Pricer (Excel / VBA)

- Prices European options and analyses Delta, Gamma and Vega; tested against historical market data around the March 2020 shock.

### SKILLS

Sales and communication: B2B prospecting; targeted outreach; interviews; event support; client and candidate database management.

Markets: FX; Rates; Equity Derivatives; options and Greeks; volatility; VaR; stress testing; cross-asset monitoring.

Tools: Bloomberg BQL; Excel / VBA; Python (pandas, scikit-learn); SQL / BigQuery; R; JavaScript; data visualisation.
