

France-Luxembourg CIB benchmark — four brands, two evidence layers

A map locates the franchises; the panels show the public scale signal without mixing global BNP/CACIB data with local Luxembourg entities.

HOW TO READ THE COMPARISON

The visual separates the only two defensible comparison layers

FRANCE / GROUP SCALE

BNP CIB and CACIB NBI signals

same unit · group reporting · not France-only

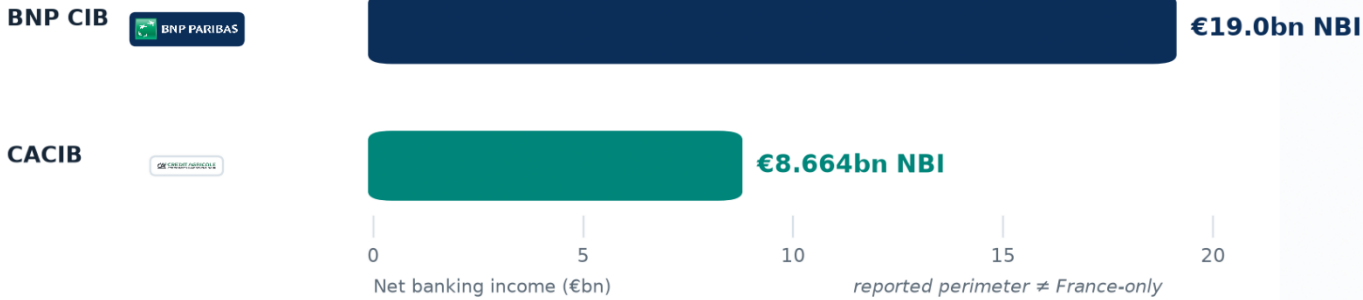

LUXEMBOURG / LOCAL SIGNAL

BNP CIB and CACEIS local disclosures

different entities · dates · business models

1 | GROUP PLATFORM SCALE

FY2025 published group signals · not France-only · same NBI unit

2 | LUXEMBOURG LOCAL SIGNALS

Different legal entities / reference years · deliberately not a league table

EXECUTIVE READING

BNP CIB and CACIB carry the group-scale signal; Luxembourg reveals two distinct local business models.

Use as a comparator, not as a four-way revenue ranking.
