Course type	Mandatory
Teaching modality	Présentiel

Course description

This module aims to prepare students for an in-depth examination and comprehensive analysis of various financial accounting topics. It introduces the students to the basic framework of international financial reporting standards (IFRS). Nowadays, financial reporting objectives are much broader than just “crunching” or generating numbers.

This course will illustrate that reporting involves a comprehensive knowledge of businesses in order to provide the information required by the many stakeholders. The main objective of this course is to develop students' analytical skills and critical assessment of individual financial statements, and/or consolidated integrated annual reports in an international environment.

Prerequisites

Fundamentals of Accounting,

Course plan
