Barclays Europe — Early Careers

Sales, Trading and Structuring Off Cycle Internship Programme 2027
52 avenue Hoche, 75008 Paris

Dear Hiring Team,

I am applying for the **Sales, Trading and Structuring Off Cycle Internship Programme 2027** in Paris. I am a final-year student on SKEMA Business School's Programme Grande Ecole (Master grade) and MSc Corporate Financial Management, available from mid-December 2026.

Two things set my application apart, and I would rather state them plainly than bury them.

The first is that I have actually sold. At FinStart.io I ran B2B prospecting for a finance-focused platform — roughly 100 emails a day, 500 a week, with every response tracked. At SKEMA Job Service Paris I built partnerships for our student staffing business: our team closed EUR 19,100 of revenue, placed 125 students across 35 assignments and signed five partners, including EY. I understand that sales is a discipline before it is a product — qualifying a need, resisting the temptation to pitch too early, and following up without wearing the client down. Most candidates for a sales position have never sold anything.

The second is that I build my own tools to understand markets. I built CalvinX, a Bloomberg-style cross-asset dashboard covering FX, equity indices, rates, commodities and volatility. I built ShockLab, a portfolio stress-testing engine in Python and SQL that replays real market analogues — Lehman, COVID, the Soleimani strike — to quantify the P&L impact on a multi-asset book. I also built a Black-Scholes pricer with Delta, Gamma and Vega, which I used to locate the gamma peak of an option book during the Petrobras oil shock and to validate the short-gamma mechanism against the March 2020 crash. None of this was coursework.

Professionally, I spent five months at BPCE Assurances producing daily multi-asset reporting for investment committees — FX pairs, equity indices, rate curves and credit spreads — and running Bloomberg BQL extractions on FX forwards and swaps, with monitoring of the EURSTR and SOFR curves. That role taught me where the numbers that reach a trading floor actually come from.

I am a FRM candidate (GARP), currently completing the AMF certification, and I hold the Citi Markets Sales & Trading certificate. I am bilingual in French and English, with Spanish at B2.

Mr Olivier Moser, Sales Manager at Barclays Private Bank, kindly responded to my application and directed me to your programme, authorising me to mention his name. My enclosed CV and project portfolio provide further detail.

I am available from mid-December 2026, which matches the programme's start date, and I would welcome the opportunity to discuss how my background fits your desk.

Yours sincerely,

Calvin MINANG
