

CIB in action — from platform to client outcome

Selected public transactions turn the European footprint into a visible client franchise

DIRECTOR TAKEAWAY
CIB is not a product list: it converts a regional platform into financing, market access and post-trade outcomes.

Client need → CIB solution → public result

A four-step journey: the logo starts the story, the product explains the economics, the case makes it verifiable

CIB solutions carry different economic and risk signatures

A marketing-finance map: the client logo makes the abstract risk channel tangible
